

# Dream Big California

For more than 60 years, Wausau's windows and curtainwall systems have helped California architects dream big.

From essential government centers, schools and hospitals to high-rise residential towers that open up Pacific vistas - to office buildings that line bustling city streets - to historically accurate renovation telling the tales of time - Wausau Window and Wall Systems® delivers.

Today, the West Coast's leading design and construction teams rely on Wausau for engineering expertise and quality fabrication – backed by an industry-leading Standard Limited Warranty of up to 10 years.

## Product Line Overview

Wausau's standard thermal barrier aluminum products include INvent™ fixed and projected windows, sliding and hung windows, Custom Window™ historical products, along with SuperWall™ and INvision™ unitized curtainwall and window wall systems, all complying with California's stringent commercial energy and seismic codes.

ClearStory™ sun shades and light shelves help control solar heat gain and harvest natural daylight, while CrossTrak™ sliding glass doors "Open Doors to the Skylife."

A variety of storefront options are available through Apogee sibling company Tubelite, allowing for single source responsibility.

## About Wausau

Operating from the 300,000 square-foot LEED® - Silver Wausau Manufacturing Center and a 70,000 square-foot facility in Stratford, Wisconsin, Wausau Window and Wall Systems is part of Apogee Enterprises, Inc. (NASDAQ: APOG), founded in 1949 and headquartered in Minneapolis, Minnesota. Apogee provides distinctive metal and glass solutions for enclosing commercial buildings, as well as glass and acrylic solutions for picture framing and display applications. Companies in the Apogee family are Alumicor, EFCO, Harmon, Linetec, Sotawall, Tru Vue, Tubelite, Viracon, and Wausau.

Whether your project calls for standard Wausau products or highly-customized engineered-to-order fenestration, Wausau's windows and curtainwall can meet institutional markets' technical challenges for weather-ability, energy efficiency, seismic integrity, and blast hazard mitigation. Custom capabilities are backed by more than 1,000 years of combined design experience, as well as in-house structural engineering and a modern, LEED®-Silver certified manufacturing facility.
